Matrix Multiplication Example, Step 1

$$\begin{pmatrix} 1 & 2 \\ 4 & 5 \end{pmatrix} \begin{pmatrix} -2 & 4 \\ 2 & -5 \end{pmatrix}$$

Matrix Multiplication Example, Step 2

$$\begin{pmatrix} \mathbf{1} & \mathbf{2} \\ 4 & 5 \end{pmatrix} \begin{pmatrix} \mathbf{-2} & 4 \\ \mathbf{2} & -5 \end{pmatrix} = \begin{pmatrix} \mathbf{2} & \\ & \end{pmatrix}$$

$$\begin{pmatrix} \mathbf{1} \\ \mathbf{2} \end{pmatrix} \cdot \begin{pmatrix} \mathbf{-2} \\ \mathbf{2} \end{pmatrix} = \mathbf{2}$$

Matrix Multiplication Example, Step 3

$$\begin{pmatrix} \mathbf{1} & \mathbf{2} \\ 4 & 5 \end{pmatrix} \begin{pmatrix} -2 & \mathbf{4} \\ 2 & \mathbf{-5} \end{pmatrix} = \begin{pmatrix} 2 & \mathbf{-6} \end{pmatrix}$$

$$\begin{pmatrix} \mathbf{1} \\ \mathbf{2} \end{pmatrix} \cdot \begin{pmatrix} \mathbf{4} \\ \mathbf{-5} \end{pmatrix} = \mathbf{-6}$$

Matrix Multiplication Example, Step 4

$$\begin{pmatrix} 1 & 2 \\ \mathbf{4} & \mathbf{5} \end{pmatrix} \begin{pmatrix} \mathbf{-2} & 4 \\ \mathbf{2} & -5 \end{pmatrix} = \begin{pmatrix} 2 & -6 \\ \mathbf{2} & \end{pmatrix}$$

$$\begin{pmatrix} \mathbf{4} \\ \mathbf{5} \end{pmatrix} \cdot \begin{pmatrix} \mathbf{-2} \\ \mathbf{2} \end{pmatrix} = \mathbf{2}$$

Matrix Multiplication Example, Step 5

$$\begin{pmatrix} 1 & 2 \\ \mathbf{4} & \mathbf{5} \end{pmatrix} \begin{pmatrix} -2 & \mathbf{4} \\ 2 & \mathbf{-5} \end{pmatrix} = \begin{pmatrix} 2 & -6 \\ 2 & \mathbf{-9} \end{pmatrix}$$

$$\begin{pmatrix} \mathbf{4} \\ \mathbf{5} \end{pmatrix} \cdot \begin{pmatrix} \mathbf{4} \\ \mathbf{-5} \end{pmatrix} = \mathbf{-9}$$

Matrix Multiplication Example, Step 6

$$\begin{pmatrix} 1 & 2 \\ 4 & 5 \end{pmatrix} \begin{pmatrix} -2 & 4 \\ 2 & -5 \end{pmatrix} = \begin{pmatrix} 2 & -6 \\ 2 & -9 \end{pmatrix}$$
