

Creating Accessible PDFs With L^AT_EX

Timothy Prescott

May 7, 2026

Update L^AT_EX

```
\DocumentMetadata{
  lang=en,
  tagging=on,
  pdfstandard=ua-2,
% check-tagging-status,
  tagging-setup={
%   math/alt/use,
    math/setup=mathml-SE
  }
}
\documentclass{...}
\usepackage{unicode-math}
```

compile with LuaL^AT_EX

- Images need alt (or actualtext or artifact)
- Tables need

```
\tagpdfsetup{table/header-rows    = {...},
               table/header-columns={...}}
```

and sometimes

```
\tagpdfsetup{table/multirow={...}}
```
